

## Mon Gold Property near Yellowknife, NWT, Canada

**Mon Gold Property is a high-grade past producing (1989–1997) gold mine, from which 15,000 oz. of gold was produced from 15,000 tons of ore.**

- ▶ To February 2021, \$3.73 million has been funded into the project, for purchase of mining equipment, camp and supplies needed for mine development, winter road 2021, drilling below old stopes, geophysics and surface exploration in VMS and shear zones.
- ▶ High grade samples up to **688 g/t gold over 0.5m** have been recovered from the crown pillar. Metallurgical testing of a quarter tonne sample yielded **recoveries averaging 98.8%** at a grade of 158 gpt gold.
- ▶ Mon Gold Property is in the **Yellowknife Gold Belt**; past mining in this Belt exceeds 15 million ounces of gold at grades >0.5 oz./t, including the Con (6 m oz.), Giant (8 m oz.) and Discovery Mines (1 m oz. at 1 oz./t).
- ▶ The mineralization identified in the Mon A-Zone appears to be a viable exploration target for a “Discovery Mine” type of deposit.
- ▶ Built winter road and hauled all major mining equipment, camp, and stores to site March 2021
- ▶ **Land Use Permit and Water License for mining and milling production at 100 tpd are in place – the Mon is the only gold project in the NWT permitted for production.**

- ▶ The company also has an option to acquire a 100% interest in the highly prospective **contiguous 2,394 hectare Hangstone Property** adjoining the Mon Property to the East and South. The Mon Property shear zone and VMS targets can be projected onto the Hangstone Property.

### Estimated Dates for A-Zone Key Operational and Corporate Milestones \*

<b>Q2 2021</b>	Complete the balance of the required \$6 million expenditures on Property (\$2.27 million open as of 26 Feb. 2021) for 80% Property interest, then acquisition of the remaining 20 % interest through issuance of 25% of shares of the Company
	Complete decline to bulk sample level, take sample and move to surface mill equipment order
	Order mill equipment
<b>Q3 2021</b>	Commence drilling to define 2022 and 2023 mining below current stopes
	Assays reported from bulk sample and drilling
<b>Q 1 2022</b>	Mobilize mill and ancillary equipment to Yellowknife
	Build winter road and haul mill and stores to site
<b>Q3 2022</b>	Mill and mine fully operational
	First cash receipts from gravity gold sales

- ▶ Volcanogenic Massive Sulphide (**VMS**) and **gold shear zones** exploration opportunities on the property have demonstrated substantial additional potential. Easy 45 km to Mon Gold Property **from Yellowknife: 15 minutes by helicopter, float or ski plane.**

Market Cap \$7.6m 2021-04-12
